

NASA's Earth Science Effort Leads the World

- 14 Flight missions in operation.
- 7 Flight missions in development.
- 1700+ Operating research grants.
- These numbers exceed the combined efforts of all other Earth science programs of the world.

**This simple fact should no longer be
“Our Best Kept Secret”**

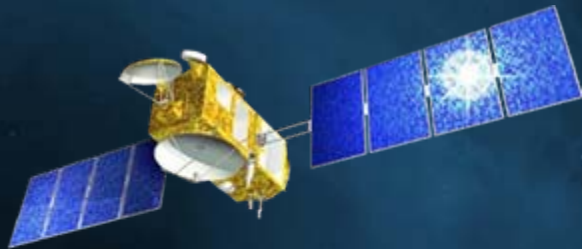

NASA's Operating Fleet of 14 Earth Science Missions

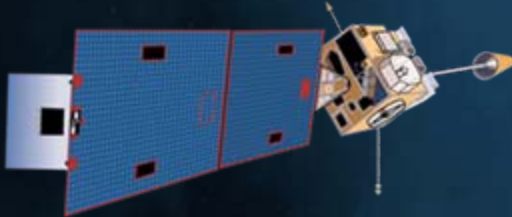

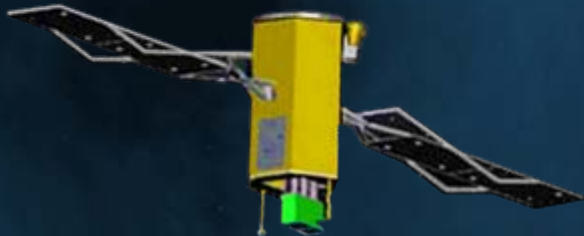

Launches in 2008

- OSTM, Launch—6/15

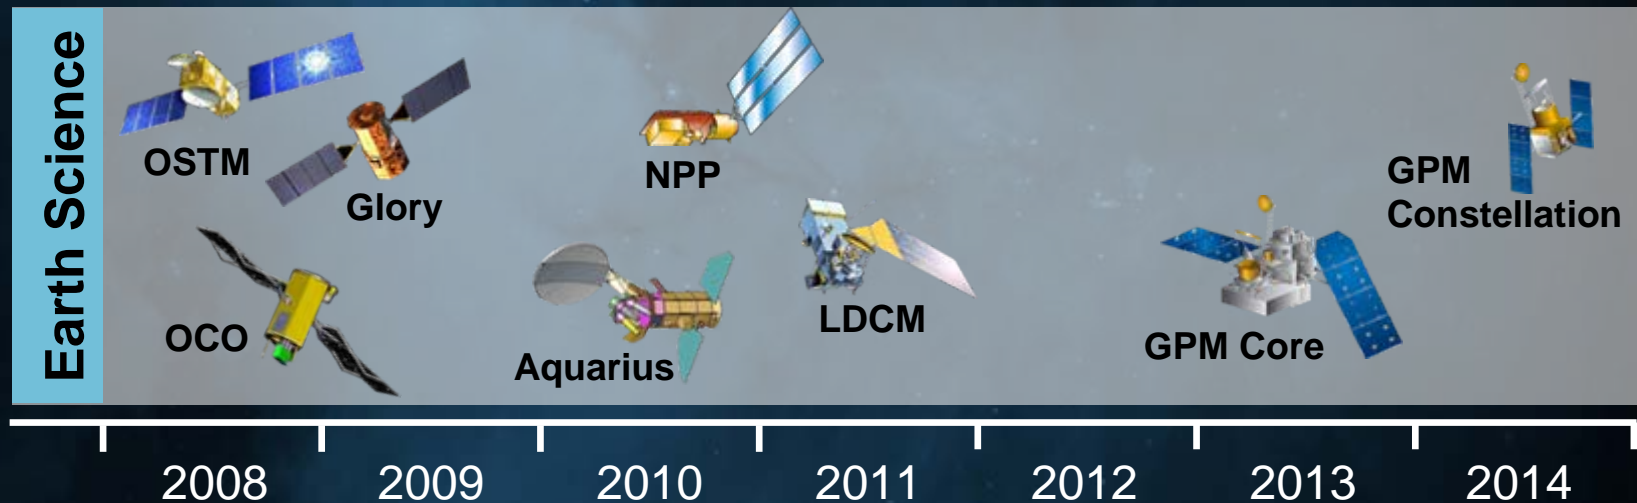

- GOES-O, Launch—8/8

- OCO, Launch—12/15

Missions in Development 2008–2014

Going Forward For the Home Planet

- We are committed to carrying out a new suite of Earth science missions that address the goals of the Earth Science and Applications Decadal Survey.
- We are also committed to working with our partners NOAA and USGS to develop improved operational Earth applications missions.
- During 2008 we will advance Earth science and provide benefits to society, we will launch missions to probe our planet, and we will solidify plans for future missions of the next decade. Stay tuned.
